

Washington's Breast and Cervical Cancer Treatment Program (BCCTP) Eligibility Requirements – Option 2

Women with the following breast or cervical diagnoses may be eligible for Medicaid:

Breast

- ✓ Atypical Hyperplasia (AH)
- ✓ Lobular Carcinoma *In Situ* (LCIS)
- ✓ Ductal Carcinoma *In Situ* (DCIS)
- ✓ Invasive Breast Cancer

For breast conditions the findings must be the pathology result of needle or other breast biopsy.

Cervical

- ✓ CIN II
- ✓ CIN III
- ✓ Carcinoma *In Situ* (CIS)
- ✓ Invasive Cervical Cancer

For cervical conditions the finding must be the result of diagnostic procedures such as a colposcopy with biopsy, LEEP or conization.

Women can receive full-scope Medicaid coverage for the duration of their cancer treatment if they:

- Are screened for and/or diagnosed with breast or cervical cancer, including precancerous conditions, under the Washington Breast and Cervical Health Program (WBCHP);
- Require treatment;
- Are under the age of 65;
- Are uninsured; and
- Meet other basic Medicaid eligibility criteria.*

Because Washington implemented the Breast and Cervical Cancer Treatment Program by selecting Option 2, women may be eligible for and referred to the Medicaid program if they are screened and/or served through the WBCHP and diagnosed with breast or cervical cancer.

Pre-determination of eligibility for the BCCTP Medicaid program is done by WBCHP. The Department of Social and Health Services (DSHS) has final approval for medical coupons. Only women who are served by the WBCHP and meet all eligibility requirements listed above can be eligible for Medicaid coverage. Women will keep full-scope Medicaid coverage for as long as they need treatment for their breast or cervical cancer.

*** Please see Fact Sheet on Eligibility Requirements for Non-Qualified Aliens.**
